

Google Drive Security

Nov. 10, 2020

To UP Users:

Please be wary of phishing attempts which involve emails and push notifications masquerading as legitimate notifications from Google. When clicked, these emails and notifications may directly take the user to a document containing a malicious link. You may learn more about this phishing scheme here: <https://www.wired.co.uk/article/google-drive-spam-comments-phishing>

Please be reminded NOT to click on ANY URL from UNSOLICITED email, even from trusted sources. We strongly encourage you to be extra vigilant when accessing websites or corresponding through email, social media, and other online platforms.

If you encounter suspicious websites, emails, and posts on social media sites, please immediately inform your CU ICT Support. You may find their respective email addresses at <https://ictsupport.up.edu.ph/>.

For your kind information and guidance.

Please be safe always.
