

Advisory - Watermark Option in Zoom

Aug. 4, 2021

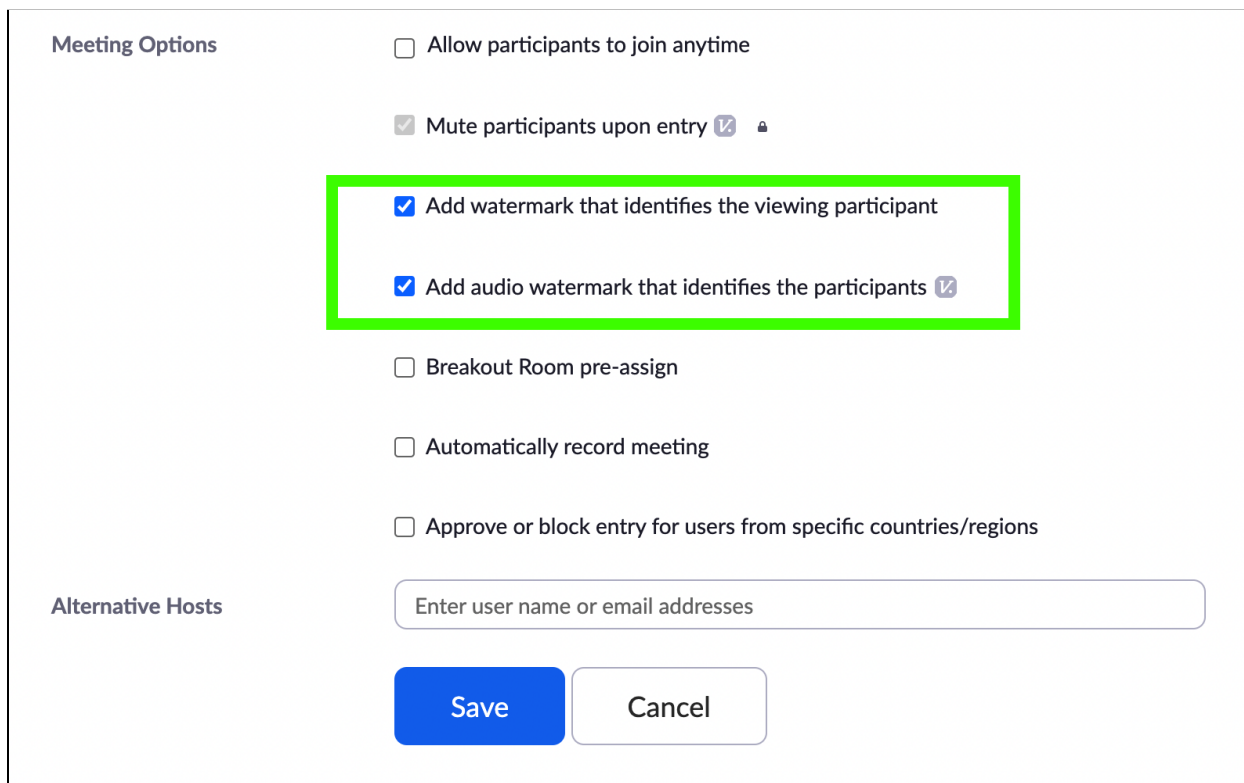

To all UP Users:

The latest update of Zoom includes a watermark that identifies the viewing participant. To disable this feature, follow the instructions below (please do this when you schedule a meeting):

NOTE: Use the Zoom dashboard on your web browser to disable these features. Please go to <https://up-edu.zoom.us/>

1. Go to the "Meeting Options" section.
2. Uncheck the "Add watermark that identifies the viewing participant" box.
3. Uncheck the "Add audio watermark that identifies the participants" box.
4. Press the SAVE button.

You may refer to the screenshot below.

The screenshot shows the Zoom Meeting Options interface. Under the 'Meeting Options' section, the following options are visible:

- Allow participants to join anytime
- Mute participants upon entry
- Add watermark that identifies the viewing participant
- Add audio watermark that identifies the participants
- Breakout Room pre-assign
- Automatically record meeting
- Approve or block entry for users from specific countries/regions

Under the 'Alternative Hosts' section, there is a text input field labeled 'Enter user name or email addresses'.

At the bottom, there are two buttons: a blue 'Save' button and a white 'Cancel' button.

Should you need further assistance, kindly contact the UP System ICT Support at <https://ictsupport.up.edu.ph/>.

For your guidance and information.
